

Empowering people with data

The statistics platform has become an integral part of the government sector. Thousands of economists, analysts, data scientists and researchers already trust in the comprehensive content of one of the largest statistics portals worldwide. Some use cases include

special projects & market research, daily tasks in planning & forecasting or detecting trends and developments at an early stage. The Statista database always provides you with the content you need.

Key figures at a glance

More than 1,000,000 statistics on over 80,000 topics across 170 industries
22,500 sources ■ More than 41,000 reports ■ Market, Consumer, Company, and eCommerce Insights
Full publication rights ■ Citation feature

Your benefits

Saving of time

Thanks to the simple and intuitive usage of the Statista platform, you save 28 minutes per statistic in comparison to the amount of time usually spent on research and editing.

High-quality data

The different research & analysis tools allow you to dive deeper into the topic of your choice. The extensive and versatile portfolio provides you with insights into a large number of topics.

User-friendliness

The data is transparent and comparable and can be downloaded as well as directly processed in the commonly used Office formats.
