

Riga

The Pearl of Latvian Wooden Architecture

We believe that Latvian craftsmen knowledge in timber as a construction

material has deep roots into our history dated back to ancient times and is inherited from our ancestors. The summer school «Riga – the Pearl of Latvian Wooden Architecture» links Latvian craftsmen know-how and RTU professors' attainment into the field of architecture. Combination of those two worlds will result in an intensive two-week summer school

where participants are able to gain new knowledge regarding wood as a construction material. **The course aim is to increase participants' knowledge about the use and properties of wood as a material in architecture, emphasizing its advantages and also increasing awareness of the wooden architecture of Latvia.**

The proposed topics of the program

2 WEEKS
6 ECTS

Latvian Traditions in Wooden Architecture

History of Wooden Architecture in Riga

Riga – Its Historical Value in Wooden Architecture

Wood Development Process – From Seed to House

Ancient know how Building Tips for Wooden Constructions
